Field Coordination and Laboratory Contacts

Mr. Bob Kluttz, Chief Chemist for Kraton Polymers (bob.kluttz@kraton.com) is the main contact for the polymer supplier during the asphalt mix design and testing protocol group discussions.

Chris Lubbers (chris.lubbers@kraton.com) and Pete Montenegro (peter.montenegro@kraton.com) remain available for supporting the field demonstration work.

We are pleased to announce that Kraton Polymers LLC is contracting with the University of Massachusetts Dartmouth (UMass/Dartmouth).

UMass/Dartmouth is to coordinate our collaborative effort for the drafting of the NEPPP regional specification for the one inch, highly polymer modified asphalt mix containing 25% RAP content by weight of the mix plus the testing requirements.

The main spokesperson for the university is Professor Walaa Mogawer in his position as director of the Highway Sustainability Research Center.

Professor Mogawer’s contact information is as follows:

Walaa S. Mogawer, P.E. – Director
Highway Sustainability Research Center
University of Massachusetts Dartmouth
151 Martine Street, Room 131
Fall River, MA 02723
508-910-9824 office
508-999-9120 fax
wmogawer@umassd.edu

Professor Mogawer and his staff manage and operate a fully equipped asphalt lab at the Fall River, MA facility.
