# ABOUT TSP<sup>2</sup>

The American Association of State Highway Transportation Officials (AASHTO) has contracted with the National Center for Pavement Preservation (NCP) to host the new Transportation System Preservation Technical Services Program (TSP<sup>2</sup>). The goals of the TSP<sup>2</sup> are to:

1. Provide a clearinghouse for comprehensive, up-to-date information on effective preservation technologies that enhance pavement and bridge performance and extend their useful service life.
2. Develop and administer a system preservation “Help Desk” to afford State highway agencies with a one-stop source for technical, training, and outreach services.
3. Offer State highway agencies the means to exchange ideas, information, and best practices with one another.

## THE TSP<sup>2</sup> WEBSITE

---

The NCP has established a new website which will serve as the focal point for TSP<sup>2</sup> information and activities. The website can be accessed at: <http://www.tsp2.org>.

Access to the website is restricted to State highway transportation personnel through

a username and password assigned on an agency-wide basis. State transportation agency staff can retrieve their organization’s access information by browsing to: <http://www.tsp2.org/register> and filling out a short user request form. This system is automated, and is designed to verify participant eligibility through the validation of your State email address.

The TSP<sup>2</sup> website has several features designed to facilitate the exchange of preservation information. These include:

1. A Bulletin Board and System (BBS), containing a wide range of preservation related topic discussion areas.
2. LISTSERV email mailing list enrollment and new list requests.
3. A Help Desk assistance request system.
4. An on-line System Preservation Technical Library.
5. An Event Calendar and
6. A Preservation News Archive.

## THE TSP<sup>2</sup> HELP DESK

---

State highway agency staff may request personalized assistance on any system preservation-related issue. The staff of the NCP has extensive experience with a wide range of preservation technologies and best practices, asset management and network evaluation.

### Contacting the Help Desk:

**Call: 517-432-8220 (M-F, 8-5 EDT)**

**Fax: 517-432-8223**

**Email: [ncpp@egr.msu.edu](mailto:ncpp@egr.msu.edu)**

**Web: <http://www.tsp2.org>**

## TSP<sup>2</sup> EDUCATION AND OUTREACH SERVICES

---

NCP preservation specialists are available through the TSP<sup>2</sup> for 1 – 2 day seminars covering a variety of system preservation topics at your State highway agency. Some examples of the training we can provide include:

1. Overview of preservation technologies and best practices.
2. Network evaluation and asset management techniques.
3. Integrating preservation in network strategy.
4. Sessions on specific preservation treatments.

## HELP DESK QUESTIONS?
