

NorthEast Bridge Maintenance Working Group
Engineers Committee

“Mission Statement”

It is the mission of the NEBMWG, through the free and open exchange of ideas and information, to better serve our customers, those who utilize the transportation system in the northeast. We will strive to use innovation, new ideas, new products and a determination to use our combined experience to make our bridge maintenance procedures and repairs the best that can be offered anywhere. Together we will take bridge maintenance in the northeast forward, and through team work and cooperation increase morale and bring a positive sense of accomplishment to the team members of the bridge maintenance departments.
